

Many Providers are offering e-visits. E-visits allow you to communicate with your provider on a medical issue electronically. You can answer electronic questionnaires about the symptoms or even send a photo or video to the provider about the condition.

Once your provider reviews the information, they can offer medical advice for at-home care, place an order for a prescription or suggest you schedule an appointment to be seen for treatment.

From the home workspace:

- **Click the Menu icon**
- **Click E-Visit – Opens E-Visit Terms and Conditions**
- **Read and Accept** the terms and conditions
- **Select an option for What brings you in today?**
- **Choose a recipient** from the dropdown menu
- **Answer who should be able to view messages related to this E-Visit?**
- **Choose a pharmacy for your prescription if needed**
- **Click Next**
- **Update person, Health Issues, Medications, Allergies and complete any Questionnaires.**
- Once completed, submit your request.

Once the message is sent, the provider or clinical support person within the clinic or office will follow up.
